SUMMARY

I am a web developer who specializes in front-end development. I have experience building modern, responsive, and efficient applications. I focus on creating scalable user interfaces, solving technical challenges, and collaborating effectively with cross-functional teams. I enjoy exploring new technologies and improving user experiences. I am currently interning as a web developer at Elok Printing and am actively seeking opportunities to grow as a front-end developer.

PROJECT EXPERIENCE

Aug 2024 – Dec 2024 | Web Developer – DPKM Wayang Golek (UGM)

- I developed the Wayang Golek section of Wayang Kita, focusing on accessibility, performance, and structured content management.
- Implemented a CMS for easier file management and optimized UI responsiveness. Conducted debugging and testing.
- <https://wayangkita.sv.ugm.ac.id/>

Aug 2024 – Dec 2024 | Frontend Developer – LSP UGM

The project is currently available for a local demo, and environment variables can be provided upon request.

- Interfaces for exam data, TUK, and MUK management were developed using Tailwind CSS and Laravel Blade.
- I ensured usability, consistency, and smooth integration with backend systems.

Mar 2025 – May 2025 | Web Developer – SIMA Desa Karangtengah

The project is currently available for a local demo, and environment variables can be provided upon request.

- Interfaces for exam data, TUK, and MUK management were developed using Tailwind CSS and Laravel Blade.
- I ensured usability, consistency, and smooth integration with backend systems.

Feb 2025 – Jun 2025 | Frontend Developer – Finance Tracking (STEAM Foundation)

The project is currently available for a local demo, and environment variables can be provided upon request.

- I developed the front end using Next.js and Tailwind CSS, including the billing, expenses, reports, and invoicing modules.
- I built reusable components and integrated secure API workflows.

Apr 2025 – May 2025 | Frontend Developer – Growish (LabGizi System)

The project is currently available for a local demo, and environment variables can be provided upon request.

- Modern UI components were built for recipe and nutrition management with Next.js and Tailwind.
- The backend API (Railway) was integrated, and system performance was optimized.

Jul 2025 – Aug 2025 | Frontend Developer – Pelaut Hebat

- I developed a maritime safety platform with features such as a safety checklist, a community map, a Gemini AI-based sea condition checker, and 24-hour weather forecasts.
- The focus was on UI responsiveness, accessibility, and cross-device usability.
- <https://pelauthebat.vercel.app>

Oct 2025 – Nov 2025 | Frontend Developer – Ambil Prestasi

- I developed the front end of an online learning platform using Next.js 15, TypeScript, Tailwind CSS, and Radix UI.
- I implemented role-based features for admins, teachers, and students, including class, material, and quiz management.
- I integrated RESTful APIs with a secure environment and optimized performance using Turbopack.
